## WEICHT PROCRAM

It is important to not only track your progress each time you lift, but also note your potential failures. Your goal should be what is on the sheet. If you do not complete the circuit in time, please make note of it, and encourage yourself (and your partner) to lift with a little more intensity. If you finish early, please to more exercises that pertain to the body parts we are working that particular day. Any questions about the movements please ask a coach.
